DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biedermann'702 in view of EP'215.

The Biedermann'702 teaches the claimed invention except the additional etherified melamine-formaldehyde resin. See Abstract, column 2, lines 40-67, column 3, lines 40-67, column 4, lines 1-50, column 5, lines 13-43, column 6, lines 25-50, column 7, lines 1-40.

However, The EP'215 reference teaches that it is known in the art to use such etherified resins. See international search report conclusions. It would have been obvious to one having ordinary skill in the art at the time of the invention to include etherified melamine-formaldehyde resin in the composition of Biedermann'702 since such would optimize properties of such composition.

Art Unit: 1773

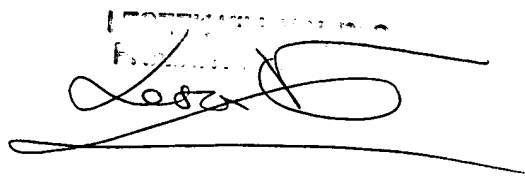

The amendments and remarks submitted by Applicants in their last response have been fully considered. The claims, however, remain unpatentable in view of the new grounds of rejections.
